## Présentation

### Activité détaillée

Phoenix Offshore Solutions, a young, driven, motivated company providing high quality and safe working solutions for all offshore needs. The Directors, having 30 years combined experience, in rope access and offshore industries. This ranges from Wind Turbines, substations, oil and gas platforms. We have worked with high profile clients internationally in the United Kingdom, across Europe. Specialising in offshore rope access and crane operation solutions for clients in need of professional, quality work. All of our technicians hold a range of qualifications including, GWO, IRATA, CQP, ACPA, NACE, FROSIO as well as certifications in their own areas of expertise. Senior members of the team hold offshore crane operation qualifications from Sparrows. · Rope Access Electrical and Mechanical · Welding · Painting Application and Inspection · NDT Inspection · Confined Space Operations · Crane Operations · Wind Turbine Maintenance · Blade Inspection and Repair Phoenix Offshore Solutions have been involved in each of the French Wind Farm projects from commencement to completion, utilising a variety of skills, services and solutions. For this we were employed by various main contractors due to our vast offshore experience that we brought to the sector. Our standard operating procedures include completion of all documentation ensuring compliance with regulatory and client requirements. Phoenix has all its own copyright documents that we ensure are followed and double checked and reviewed every 6 months. Phoenix Offshore Solutions complete our own LMRA and rope access method of works/ rescue plan to go alongside the issued work permit and toolbox talk, with these, we aim for zero harm, incidents, accidents, any damage to plant and environmental incidents. If in any case this does arise, we hold a no blame culture at Phoenix Offshore Solutions, we have no problems or issues, we, here at Phoenix Offshore only have solutions. We are committed to completing SHOC cards, highlighting issues and good working practices. We have a high standard and will aim to complete four a week per person, to help the Offshore industry grow and thrive through this new era in France.
